1 Introduction

This document includes what's new in version 1.8.10. You can check the version you have installed directly in the application, through the “main menu” -> “About”.

2 What's new in this version

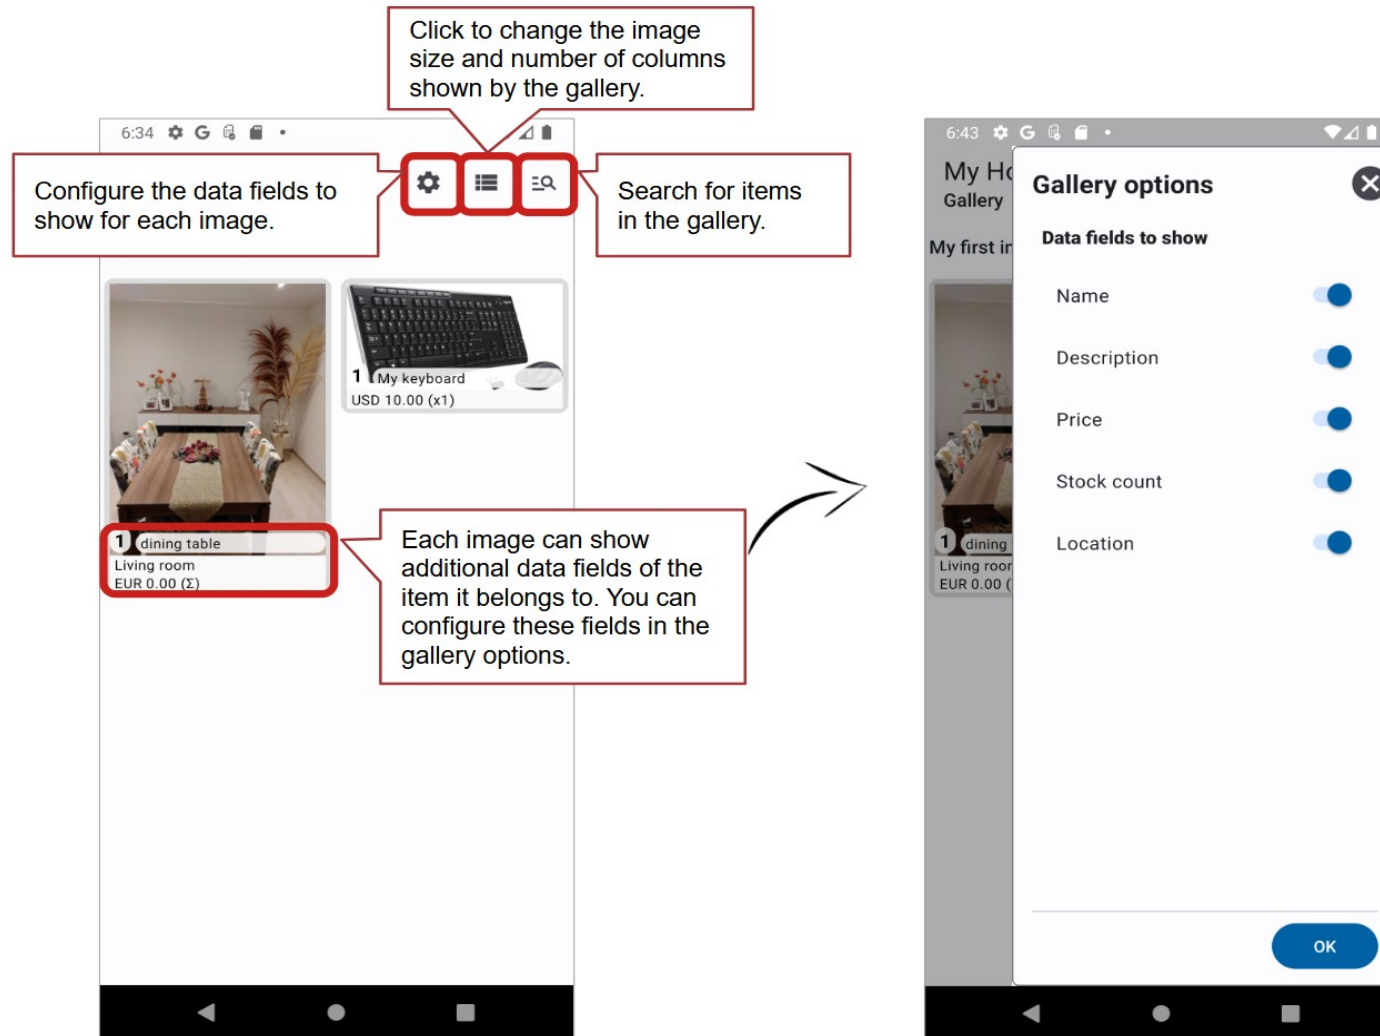

This chapter describes the added or improved functionalities in more detail:

Content of this chapter

- 2.1 Select data fields to show in the gallery view..... 4
- 2.2 Save and restore your filter-, grouping- and sorting-settings in the item view..... 5
- 2.3 Other improvements and corrections (bug-fixes)..... 6

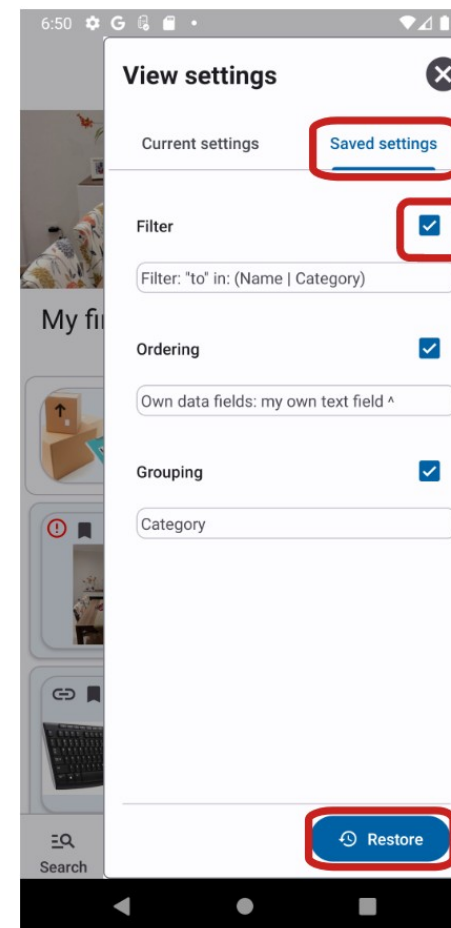

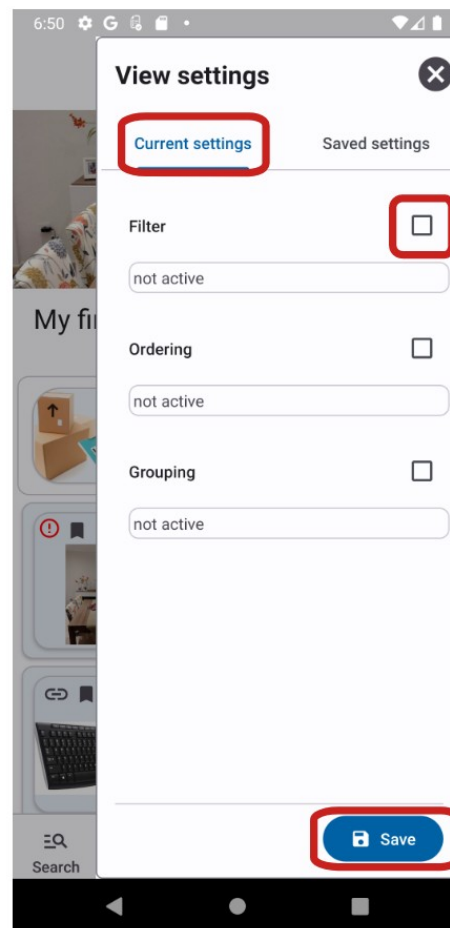

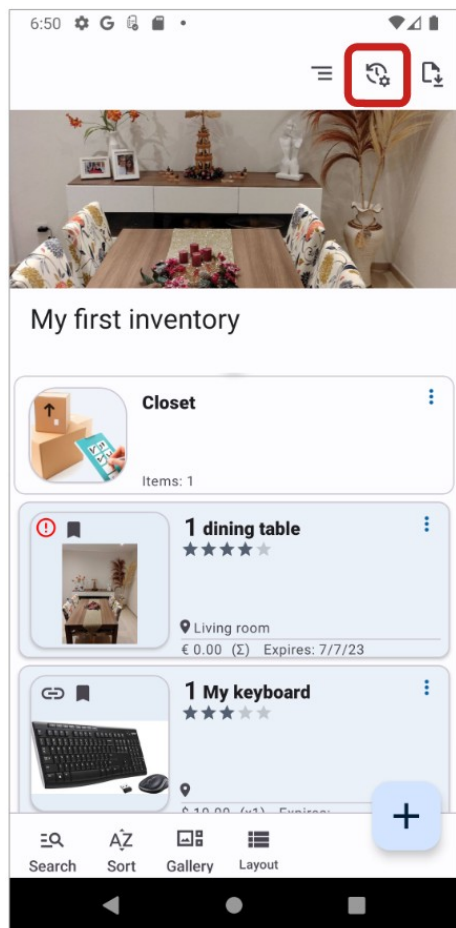

2.1 Select data fields to show in the gallery view

The gallery view allows you to search for items, to change the gallery layout and to configure the data fields each image will show.

2.2 Save and restore your filter-, grouping- and sorting-settings in the item view

The filter- grouping- and sorting-settings of the item list can be saved and restored. You can choose which settings to save or to restore.

2.3 Other improvements and corrections (bug-fixes)

This version includes the following improvements/fixes:

N.º of issue	Description of the improvement/fixed issue
#517	Inventory items list – Alert symbol shows wrong
#518	Inventory items list – include max. stock indicators
#519	Search criteria – include max. stock alert and warning
#520	Search criteria – include “expired” items
#524	Inventory items list – button design – include max. stock value
#525	Inventory items list – grouping error for rating values
#525	Inventory items list – easy design – item age is not showing correctly
