My Inventory

What's new in version 1.8.15

1   Introduction

This document includes what's new in version 1.8.15. You can check the version you have installed directly in the application, through the "main menu" -> "About".
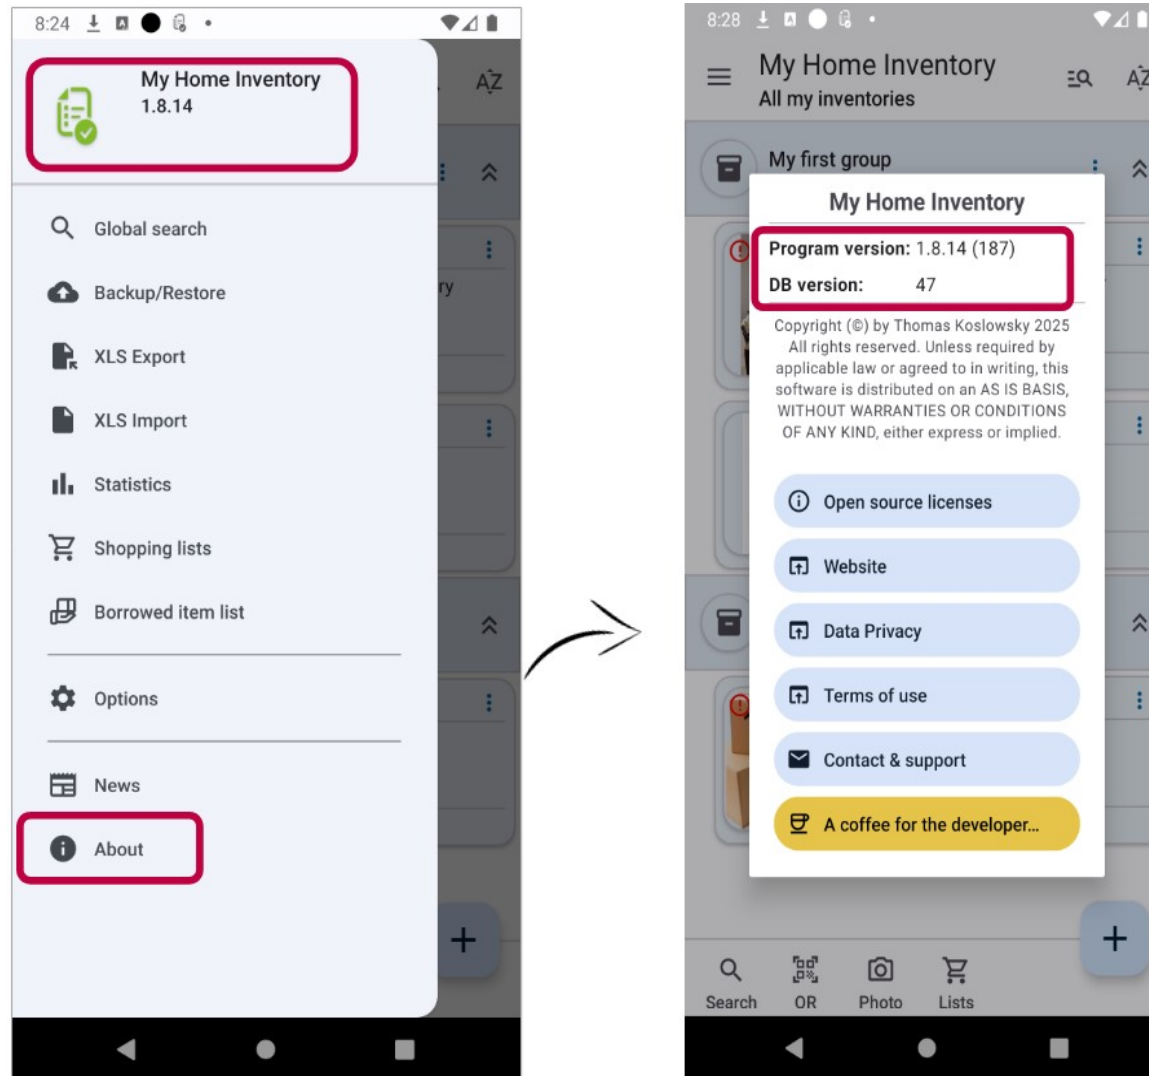

2   What's new in this version

This chapter describes the added or improved functionalities in more detail:

Content of this chapter

## 2.1 Loaning the same item to multiple recipients

When creating a new loan, and if sufficient stock is available, you can register loans of the item to multiple recipients. To do so, add every recipient using the plus sign. The remaining stock is calculated including all recipients.

After confirming the data, a loan register will be created for each recipient. You can also delete an individual tabs (except the first one). To do so, click the "Delete" button.
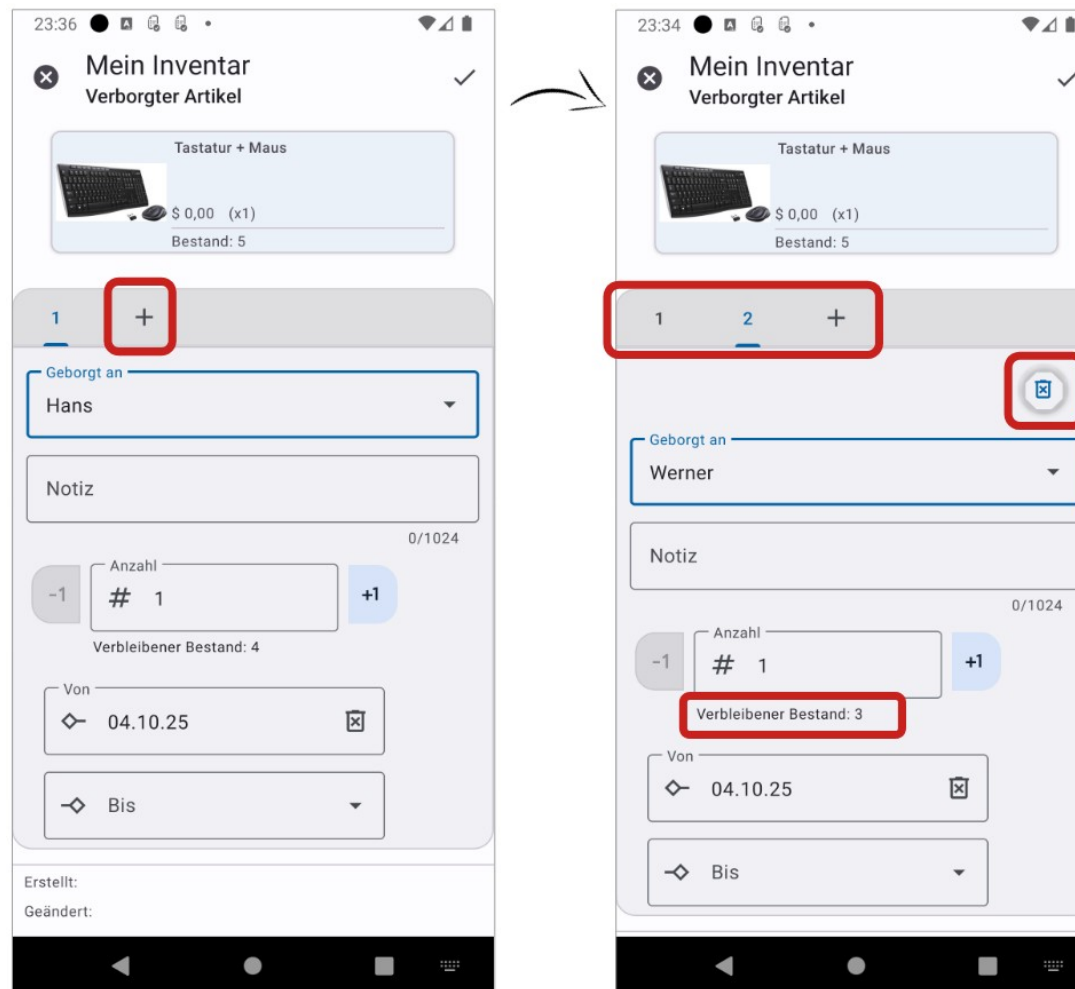

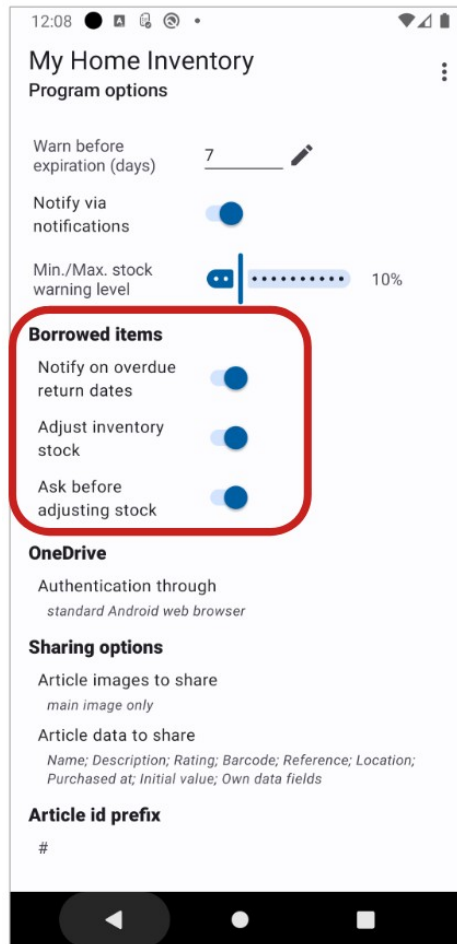

2.2 Inventory stock update of borrowed items

Borrowed items can also be deducted from the inventory and added back upon return.
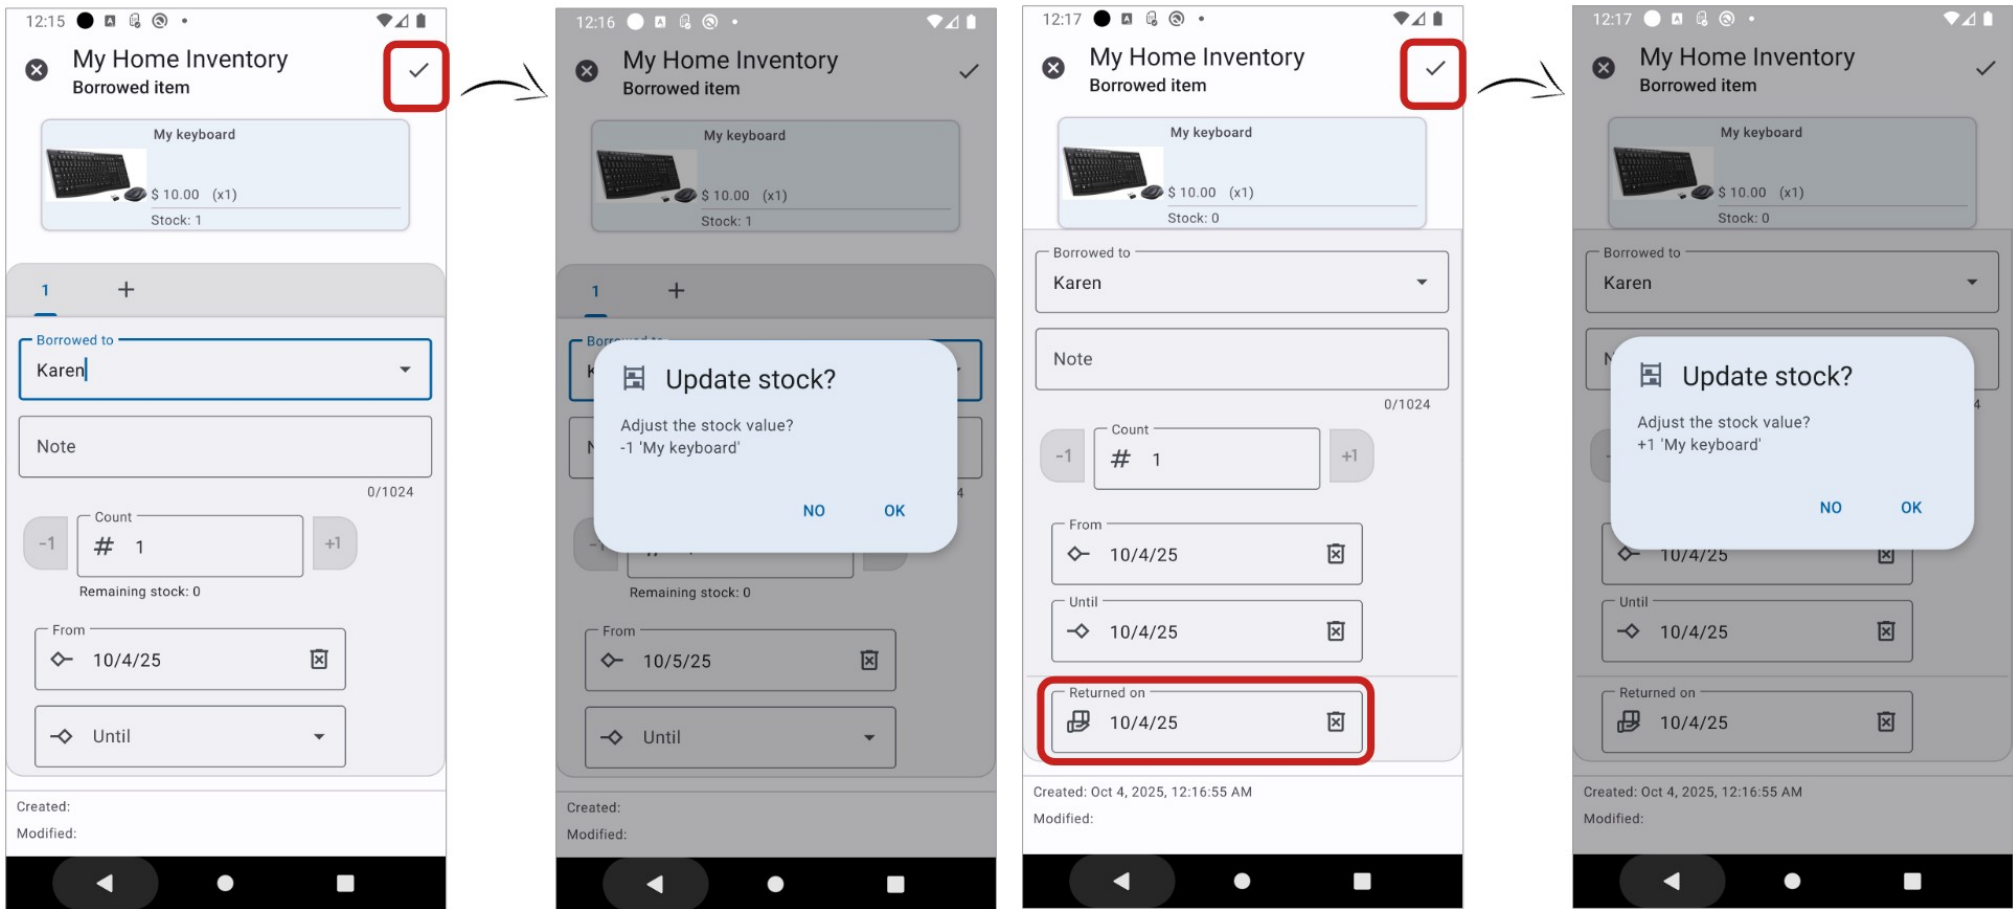

You can also deactivate this in the program options.

2.3 Maximum number of assignable custom data fields

You can now assign up to 10 custom data fields to an inventory.

2.4 Other improvements and corrections (bug-fixes)

This version includes the following improvements/fixes:

N.º of issue	Description of the improvement/fixed issue
#619	Android 16 – version adjustments.
#616	Filter-Dialog – at least one criteria must be selected.
#602, #617, #618	Accumulated values are not shown correctly.
#610	Filter is not always applied as expected.
