1 Introduction

This document includes what's new in version 1.8.17. You can check the version you have installed directly in the application, through the “main menu” -> “About”.

2 What's new in this version

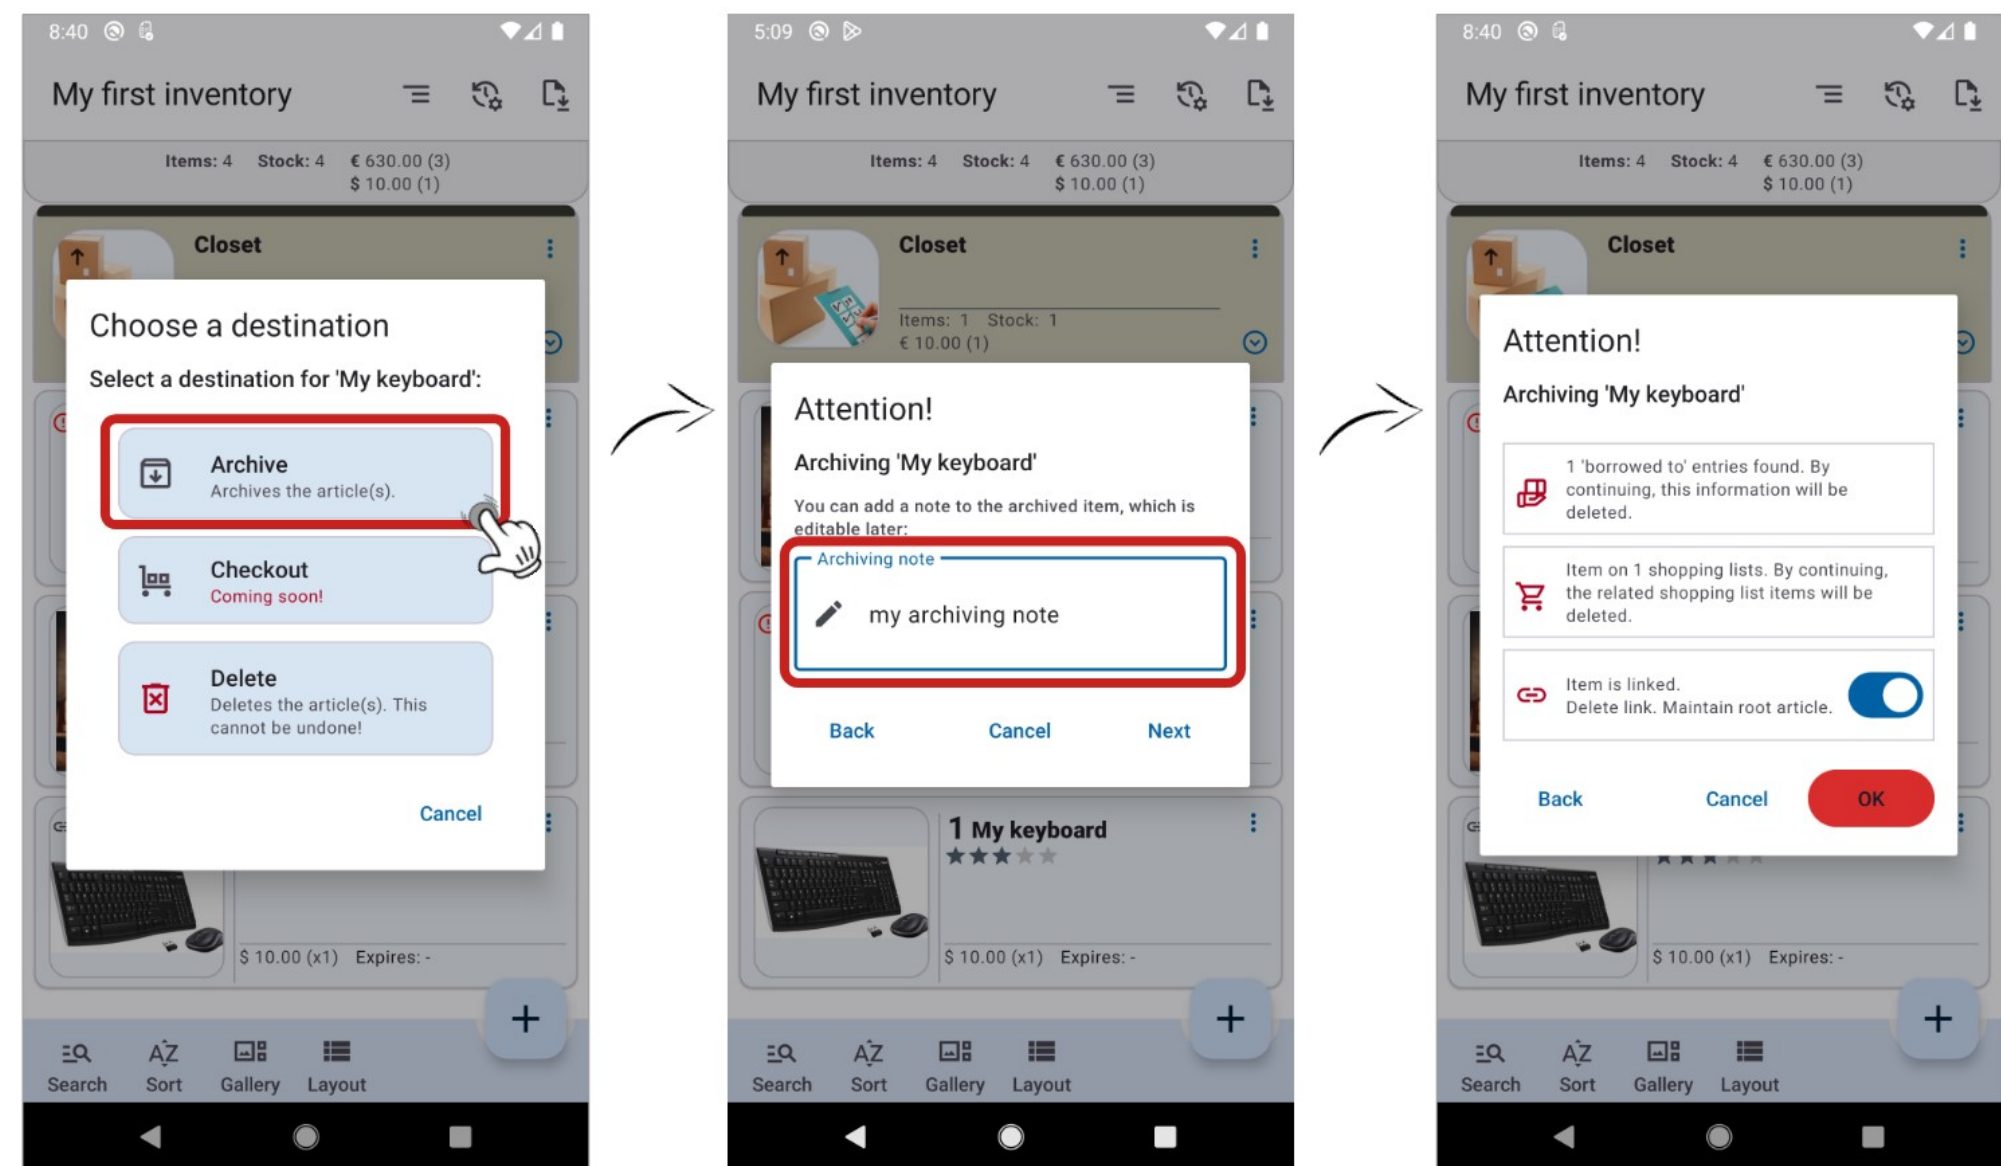

This chapter describes the added or improved functionalities in more detail:

Content of this chapter

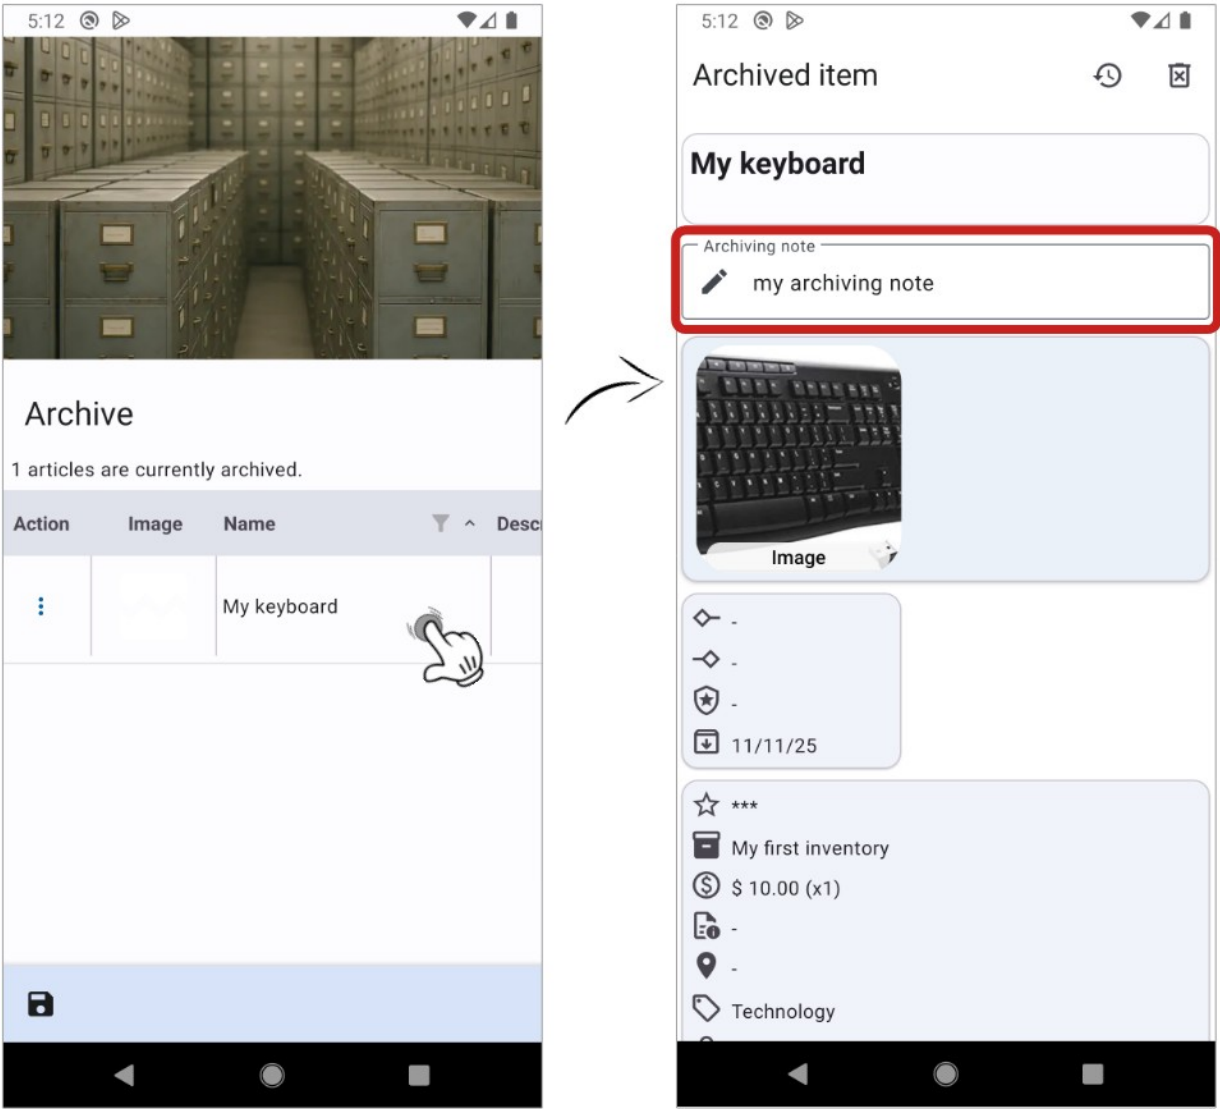

- 2.1 Adding a note to an archived article.....4
- 2.2 Expiration notices based on categories..... 6
- 2.3 Other improvements and corrections (bug-fixes).....8

2.1 Adding a note to an archived article

When you archive an article, you can add a note.

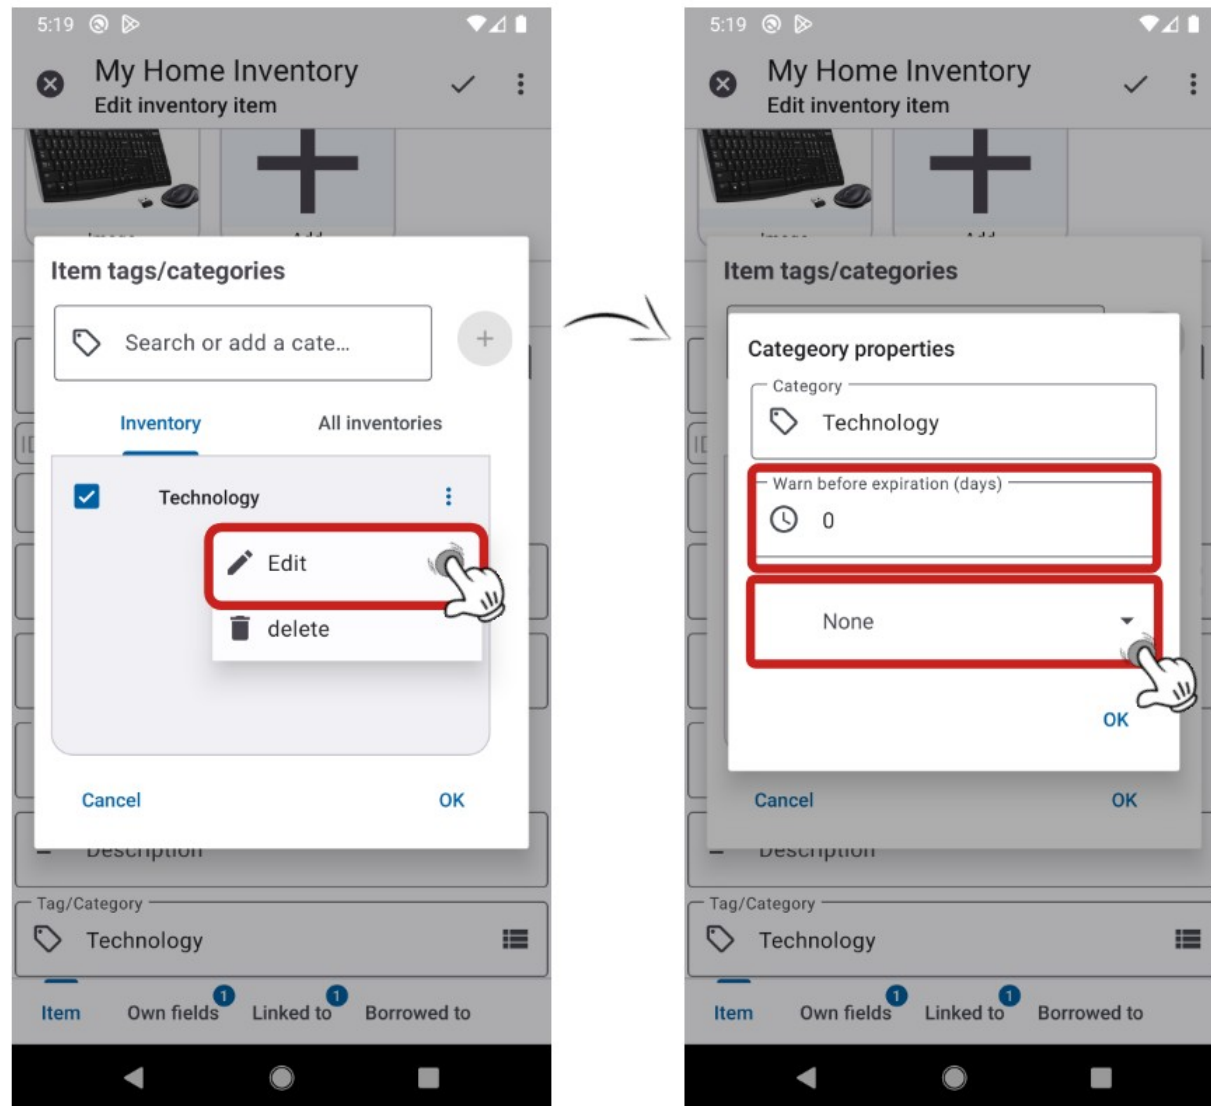

This note can be edited later when viewing the archived article.

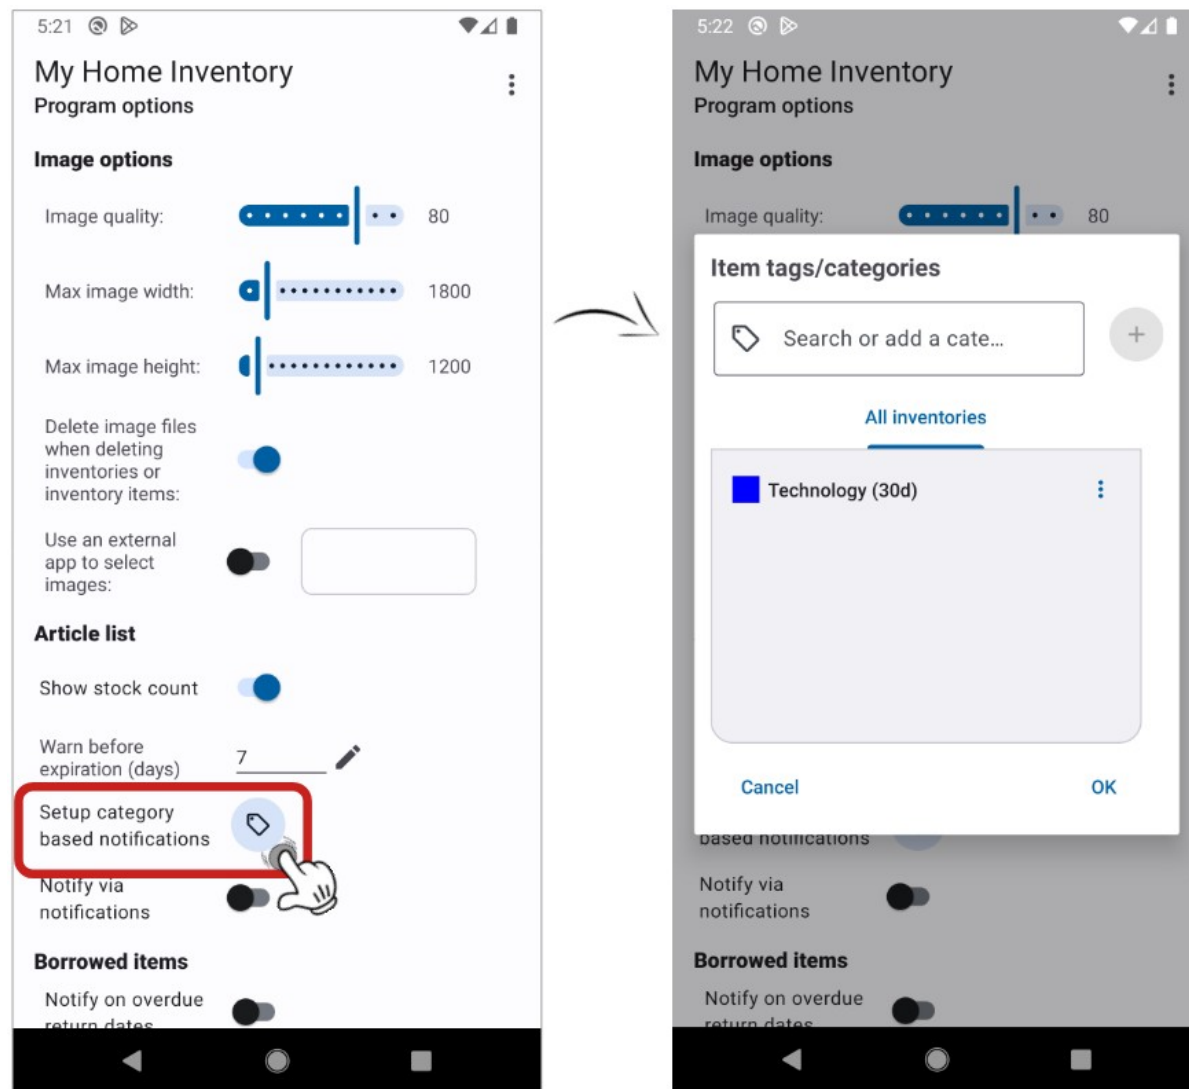

2.2 Expiration notices based on categories

You can assign each category a pre-expiration warning period in days, so the app will notify you when an item is approaching its expiration date. You can adjust this directly when selecting a category. If an item has multiple categories, the notification will be based on the highest number of days from all assigned categories. For items without a category or with categories that don't specify a pre-expiration period, the general settings will still be used.

You can also adjust the categories from the program options:

2.3 Other improvements and corrections (bug-fixes)

This version includes the following improvements/fixes:

N.º of issue	Description of the improvement/fixed issue
#644	The shopping list does not show the marked favorite image of an inventory item.
#639	Program options – includes an option to choose which of your own fields are included when sharing an article.
#637	Web DAV – supports directories with spaces in the name, for example “my directory”.
#636	Archive – include an Export export.
#635	Archive - adds an age field to the archived items list.
#632	Global search – include searching for archived, borrowed, or listed items.
#588	Borrowed items – include an Export export.
#558	Barcode reader – displays search results directly based on the detected barcode.
