1 Introduction

This document includes what's new in version 1.8.3. You can check the version you have installed directly in the application, through the “main menu” -> “About”.

2 What's new in this version

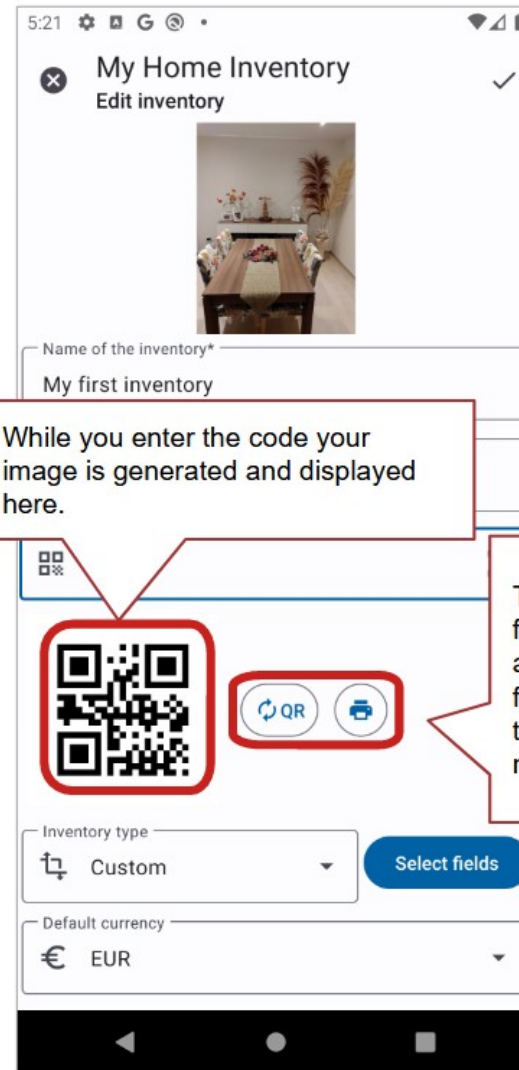

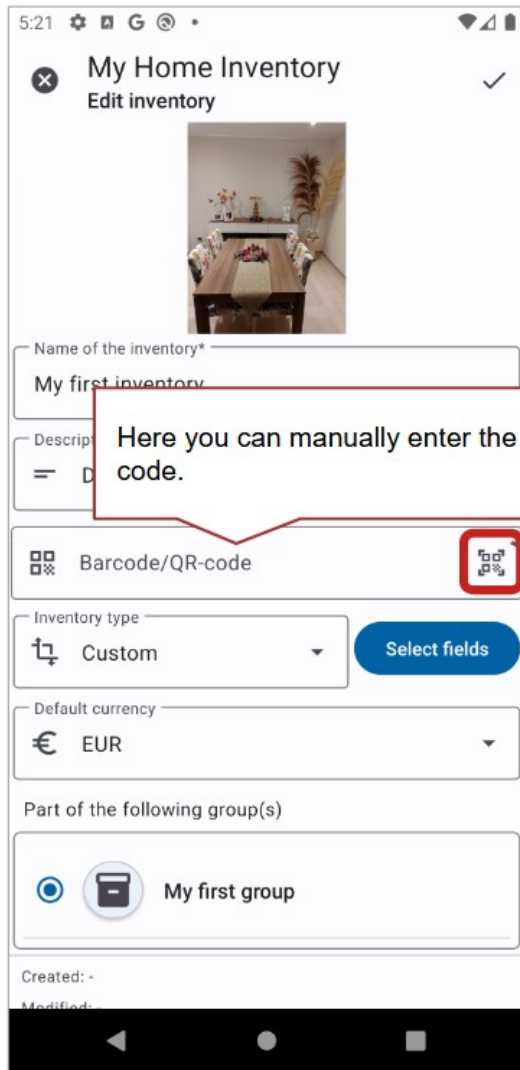

This chapter describes the added or improved functionalities in more detail:

Content of this chapter

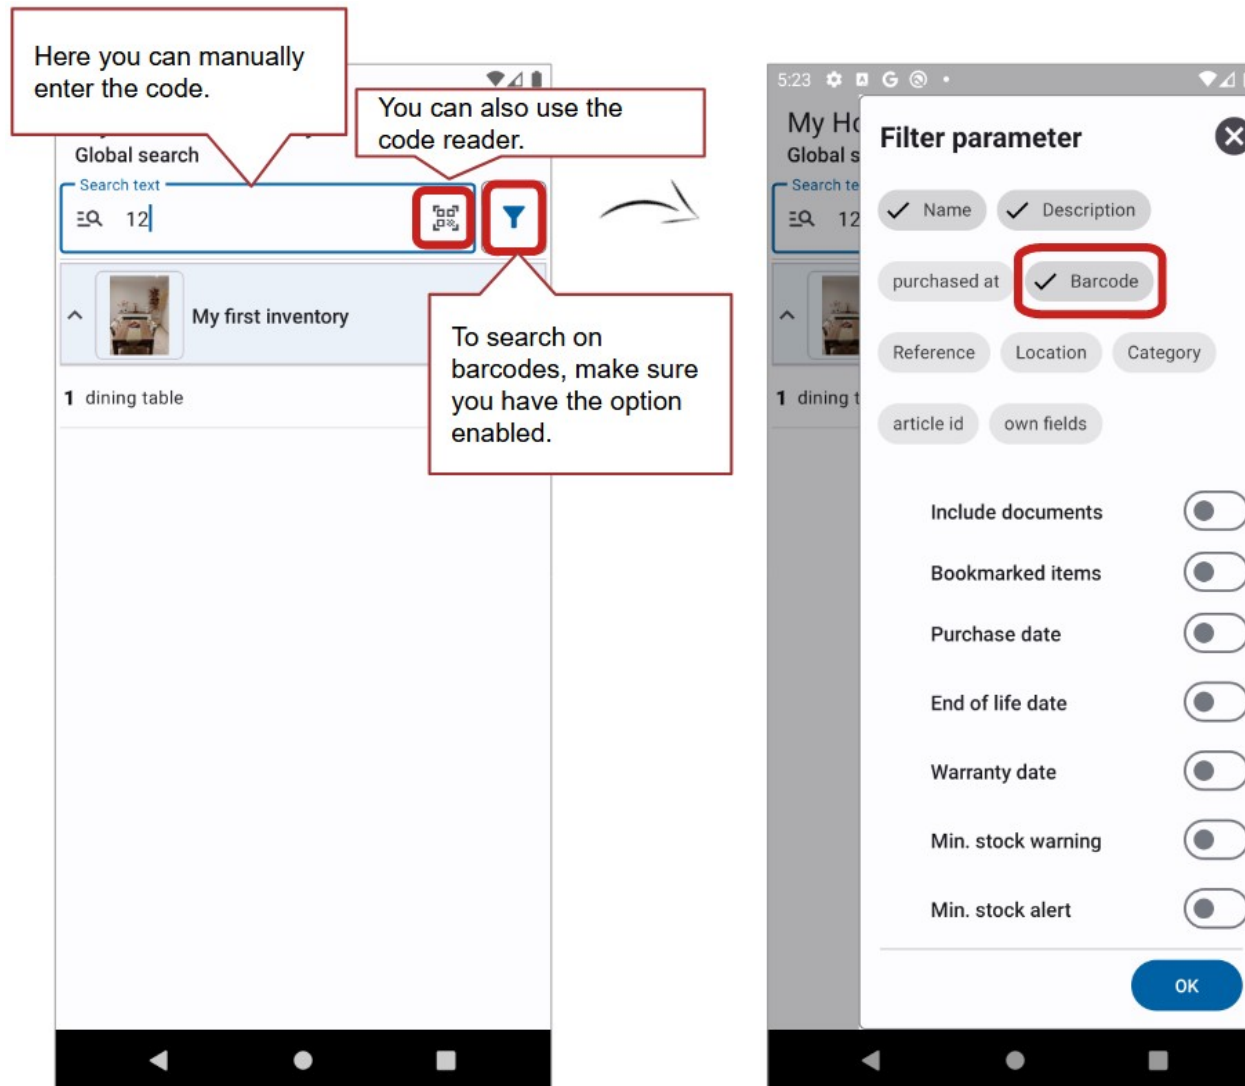

2.1 New barcode field for inventories.....	4
2.2 Open Inventories from the Global Search.....	6
2.3 Assign an image to a shopping list item.....	7
2.4 Other improvements and corrections (bug-fixes).....	8

2.1 New barcode field for inventories

You can save a barcode as a property of an inventory.

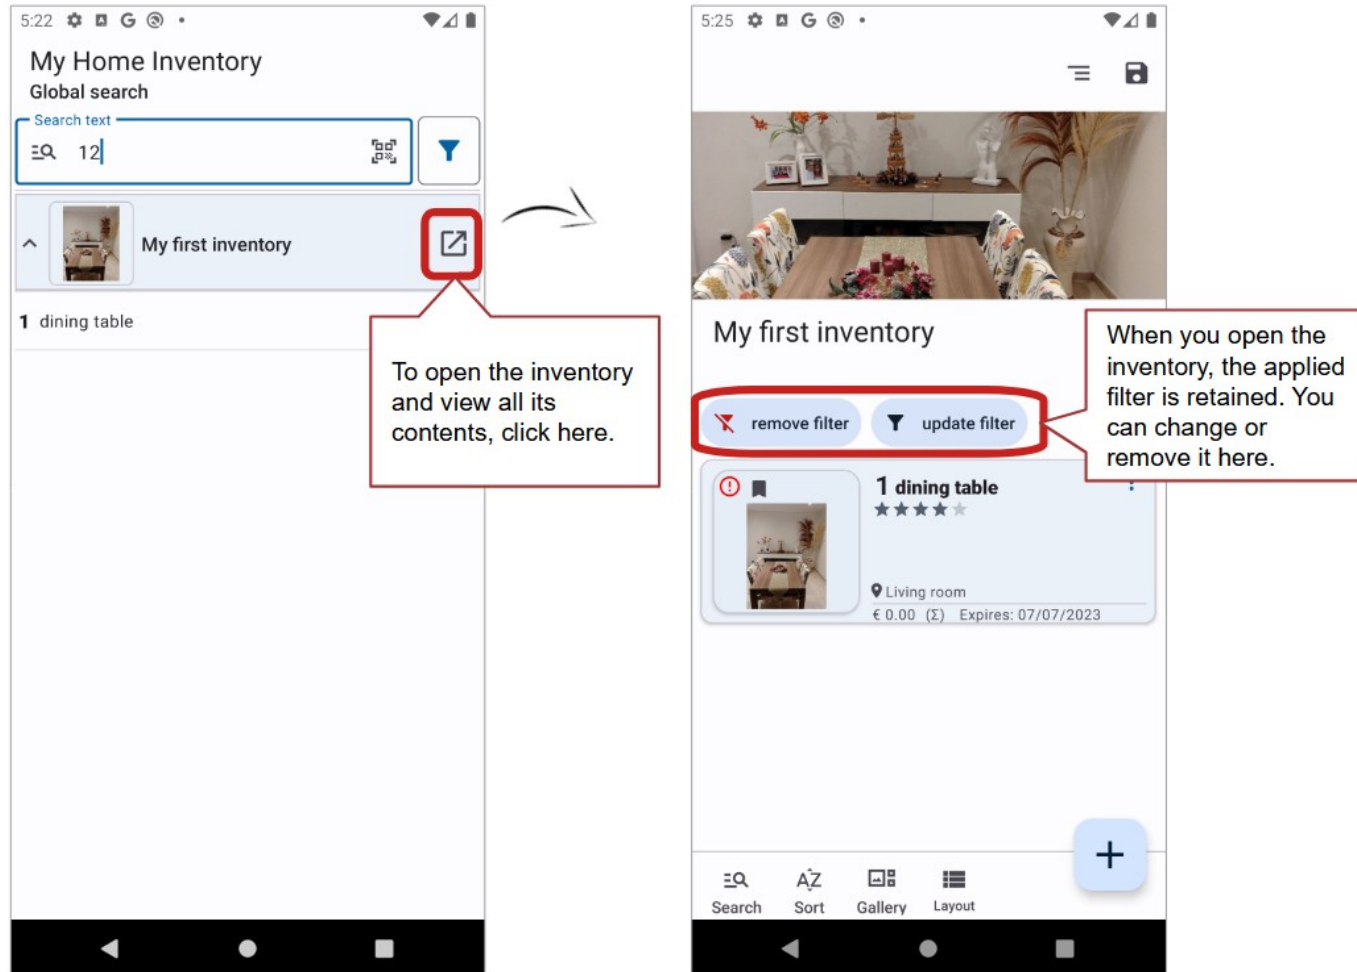

In the global search you can search for this code, activating the related option in the filter parameters.

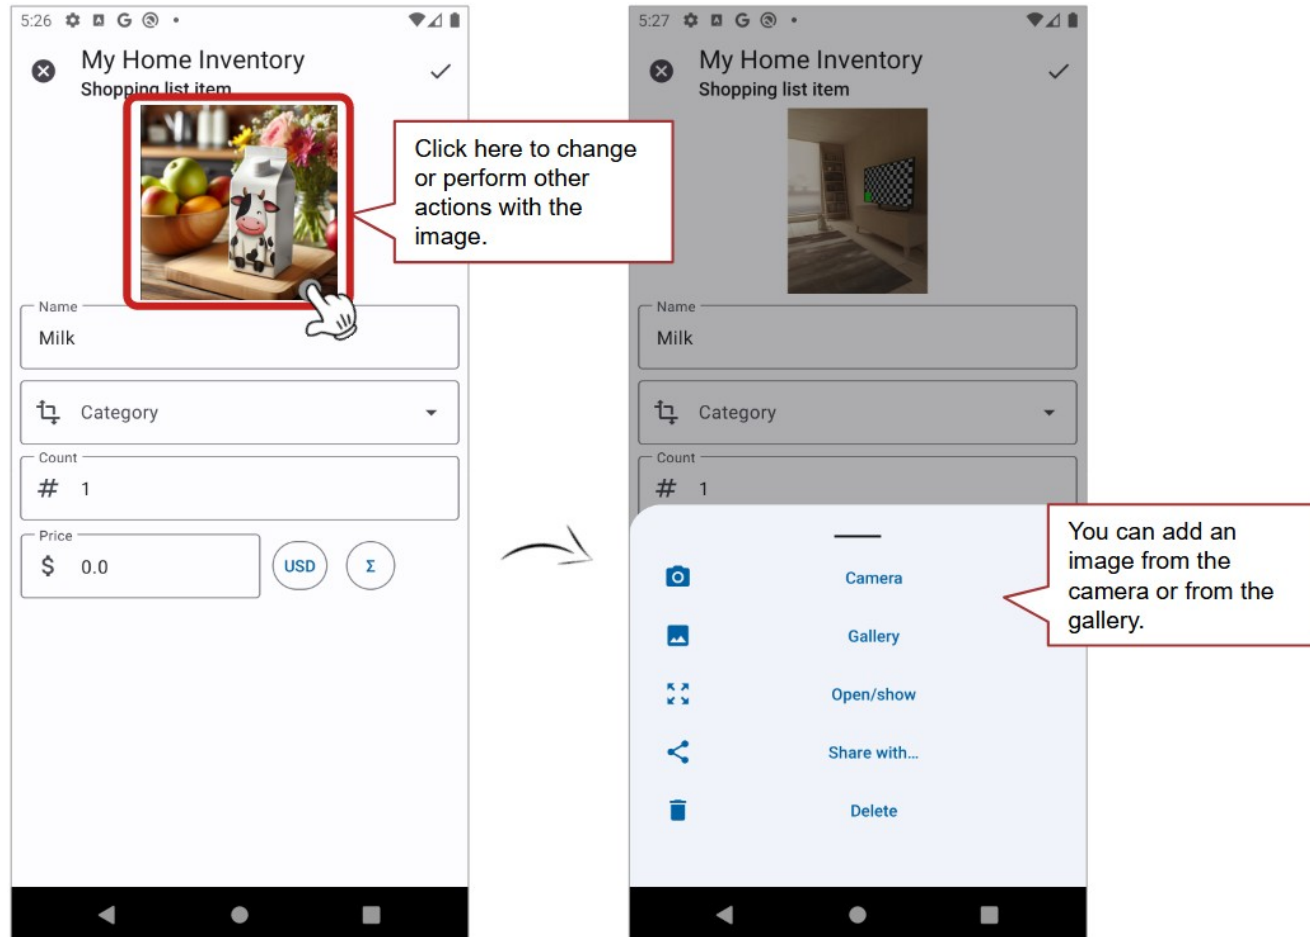

2.2 Open Inventories from the Global Search

You can now open an inventory directly from global search results.

2.3 Assign an image to a shopping list item

You can now assign an image to items in your shopping list that do not come from an inventory. To do this, open the item's editing mode and click on the default image.

2.4 Other improvements and corrections (bug-fixes)

This version includes the following improvements/fixes:

N.º of issue	Description of the improvement/fix issue
#444	Edit inventory items – Display the number of your own data fields and linked inventories on the tabs.
#429	New inventory item: Allows the item to be linked to other inventories directly upon creation.
