My Inventory

What's new in version 1.8.5

1   Introduction

This document includes what's new in version 1.8.5. You can check the version you have installed directly in the application, through the "main menu" -> "About".
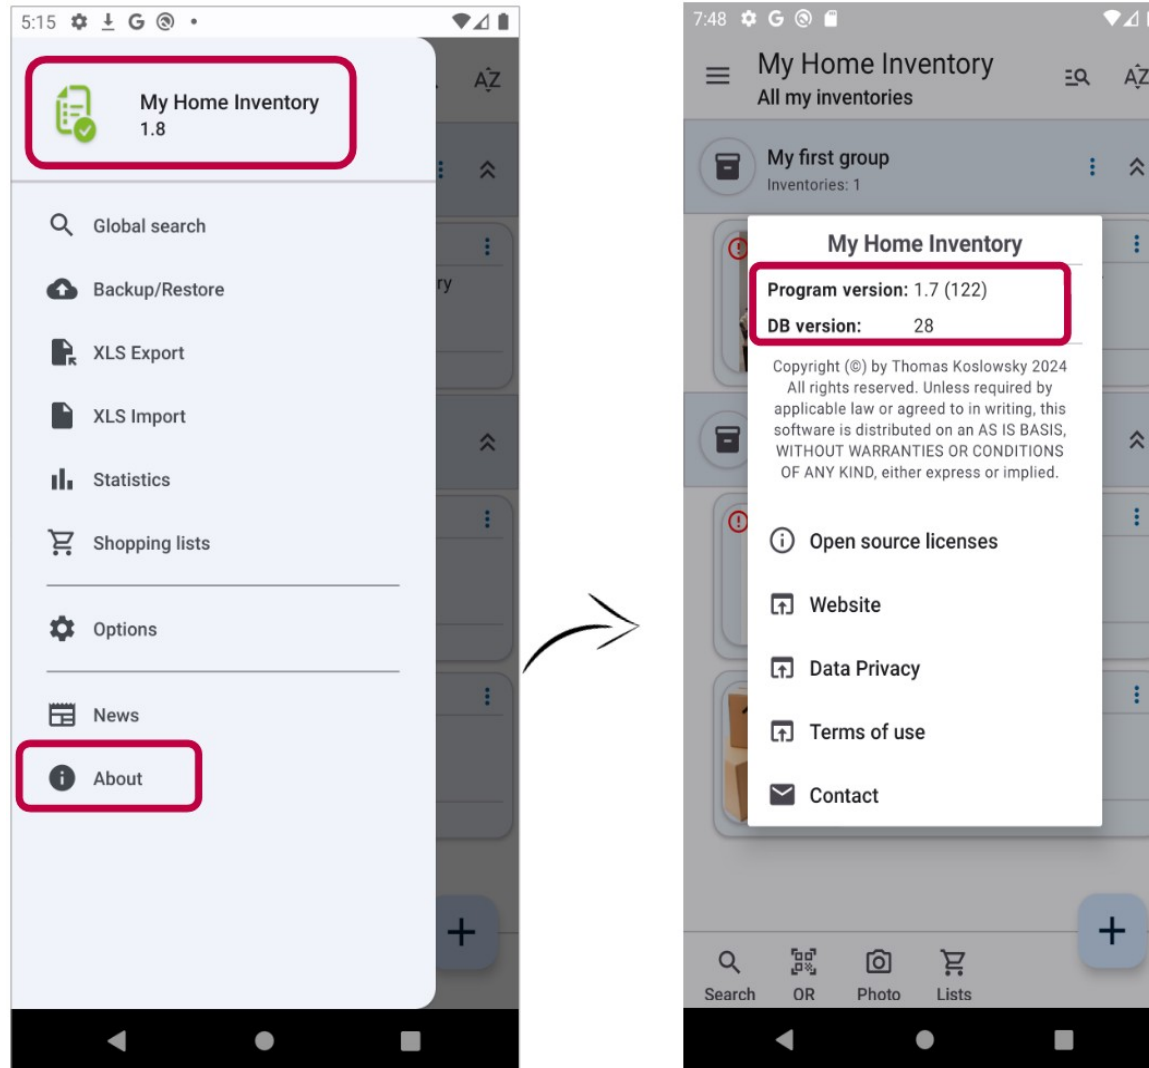

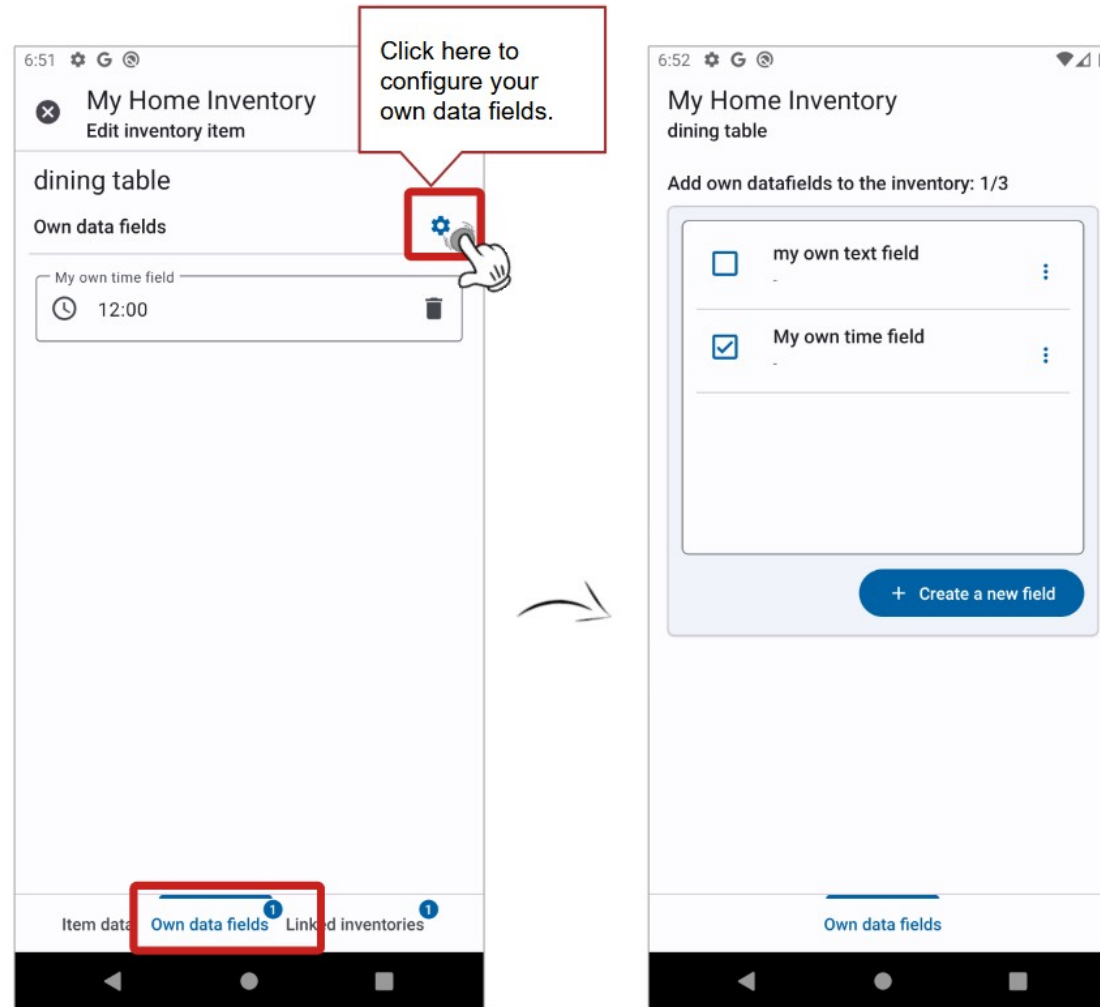

2   What's new in this version

This chapter describes the added or improved functionalities in more detail:

Content of this chapter

2.1 Configuration of your own data fields from articles

In the article editing mode of your own data fields you can now directly access the data field configuration.
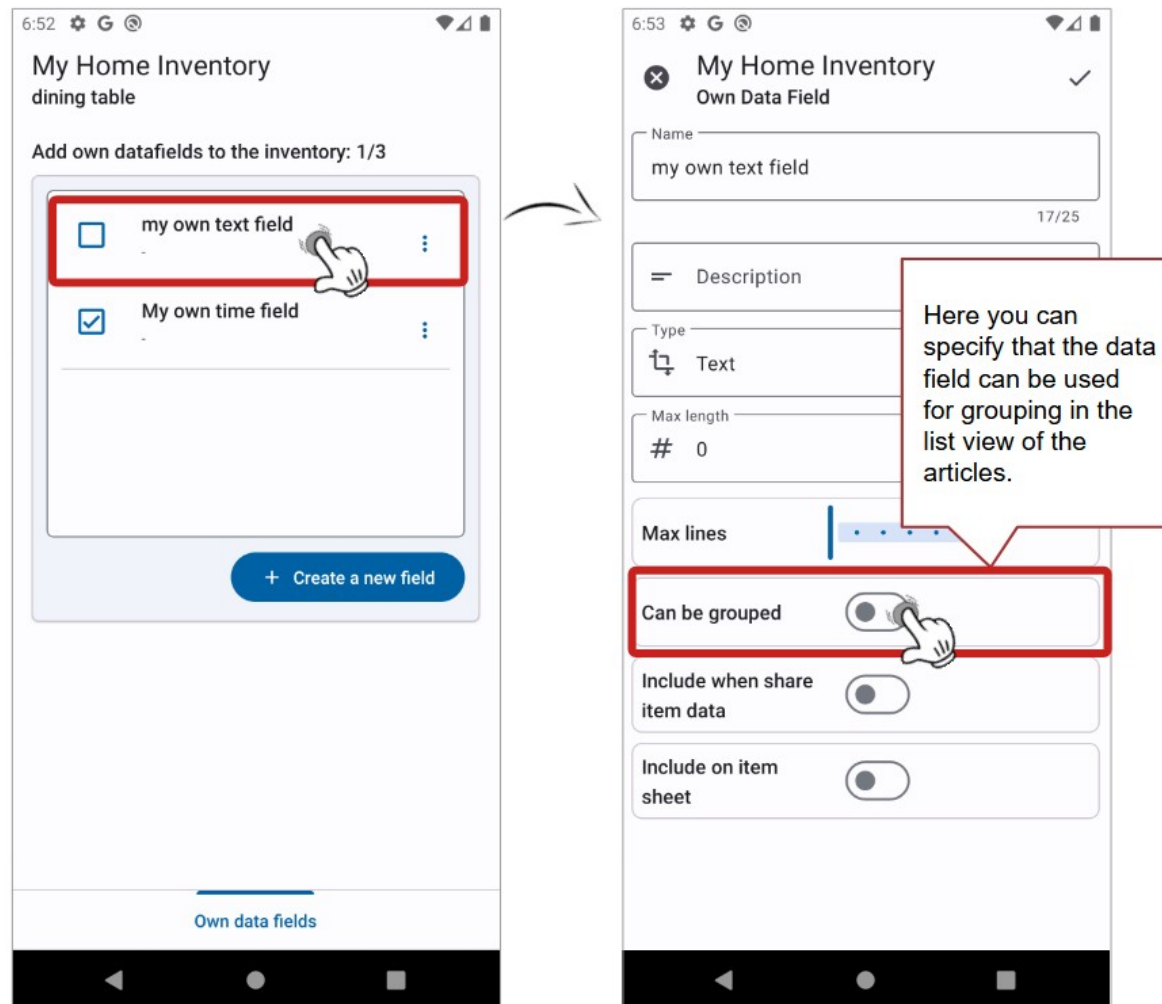

2.2 Use your own data fields for grouping

You can now also use your own data fields for grouping in the article list if you activate this in the data field.

2.2.1 Enable grouping option

You activate this function in the configuration of the data field.

2.2.2 Selection of own data fields for grouping

To use your own data field for grouping in the article list, first activate the grouping function and then click on the grouping configuration to select the field. In the list of available fields you will then find the data fields you have activated for this purpose.
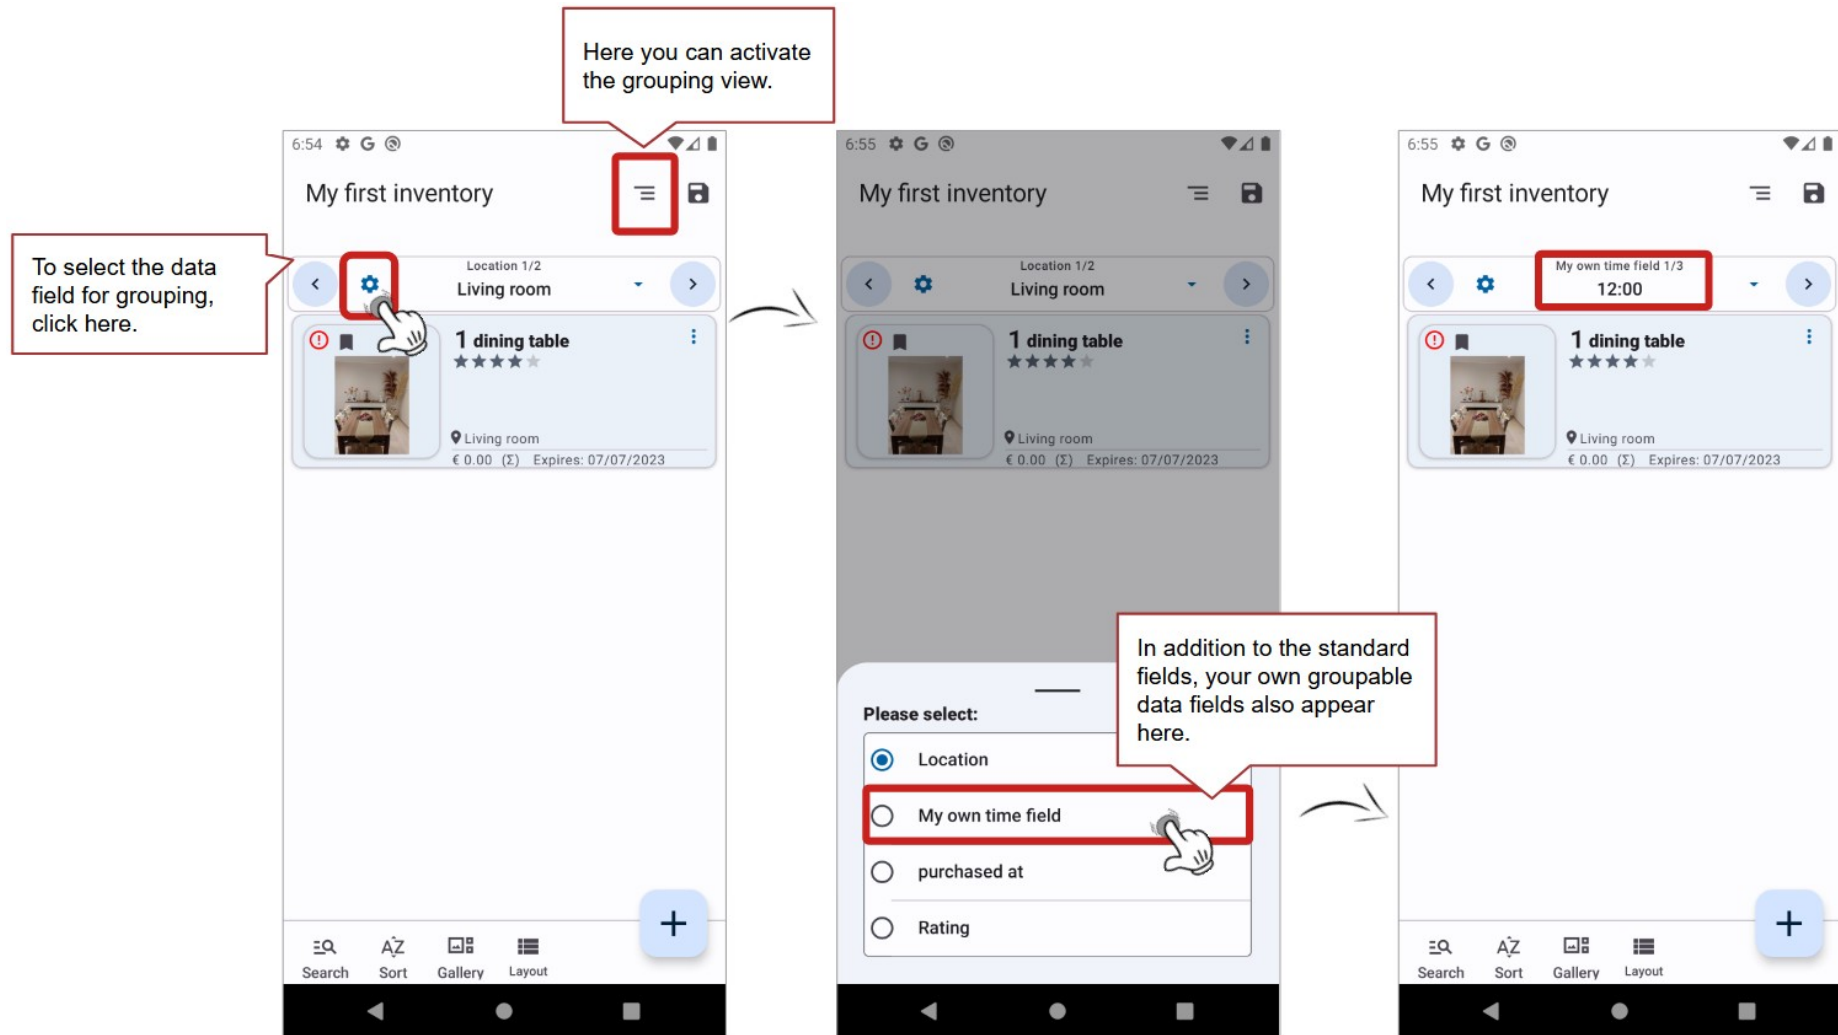

2.3 Other improvements and corrections (bug-fixes)

This version includes the following improvements/fixes:

N.º of issue	Description of the improvement/fixed issue
#457	Excel Export – only active data fields should be exported.
#458	Item sheet – only active data fields should be displayed.
