# 1 Introduction

This document includes what's new in version 1.9.1. You can check the version you have installed directly in the application, through the “main menu” -> “About”.

## 2 What's new in this version

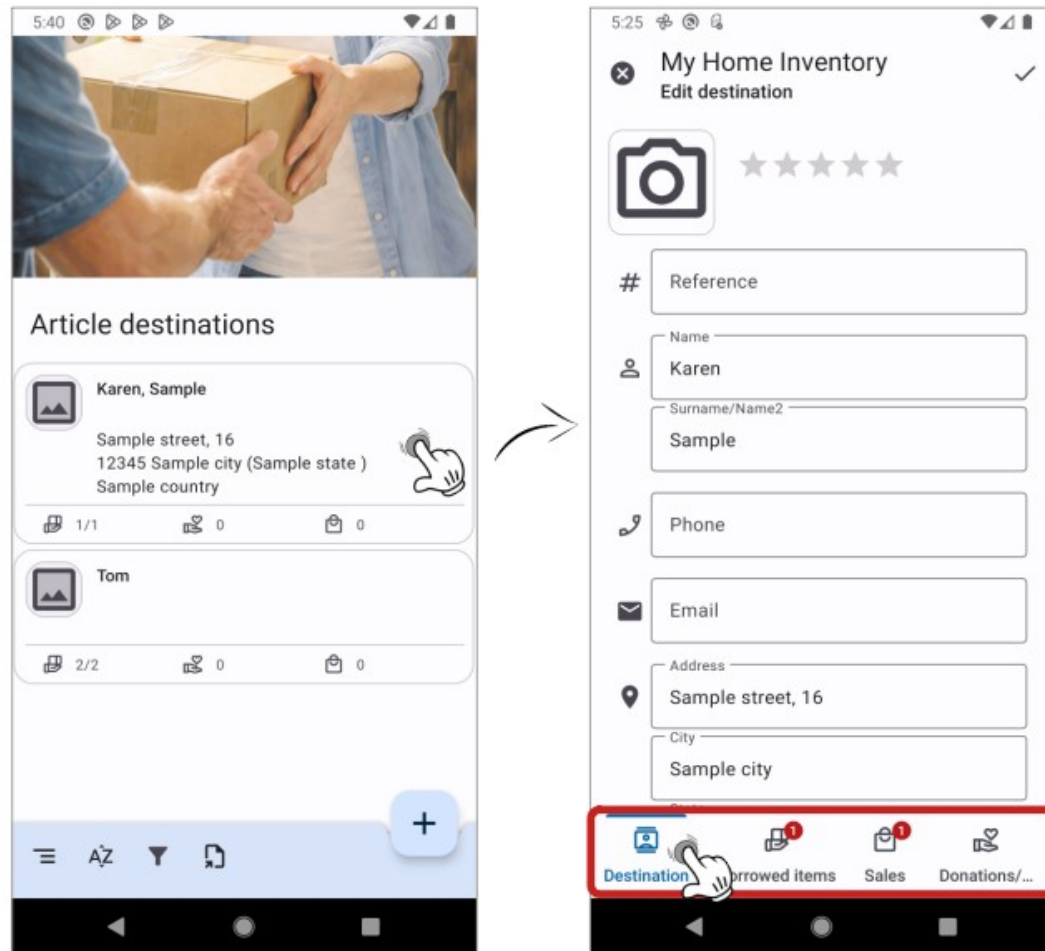

This chapter describes the added or improved functionalities in more detail:

### Content of this chapter

2.1 Showing data related to destinations.....	4
2.2 Other improvements and corrections (bug-fixes).....	5

## 2.1 Showing data related to destinations

For each destination, you can directly access some essential data when showing the destination detail. To view and edit a destination, click on the corresponding list entry or swipe the entry to the left. If borrowings, sales, or gifts are registered for the destination, you can view this data directly by using the navigation area at the bottom of the screen.

## 2.2 Other improvements and corrections (bug-fixes)

This version includes the following improvements/fixes:

<b>N.º of issue</b>	<b>Description of the improvement/fixed issue</b>
#662	Destinations data - phone number does not support the + sign on some devices.
#661	Archived articles - documents, and own data fields are not being restored.
#663	Archived articles - after archiving, the article remains visible in the article list.
